FLOWSEAL INDUSTRIES - MECHANICAL SEAL DATA SHEET
Model: FS-A21 Cartridge Seal
Order Ref: PO-88213

Design Data:
- Seal Type: Single Cartridge, Balanced
- Seal Face Material: Silicon Carbide vs Silicon Carbide
- Secondary Seal: FKM O-Rings
- Metal Parts: Duplex Stainless Steel

Operating Conditions:
- Maximum Operating Temperature: 180 deg C
- Shaft Diameter: 45 mm
- Rotation Direction: Clockwise (viewed from drive end)
- Seal Chamber Pressure (max observed): 9 bar

Notes:
- Suitable for hydrocarbon service per general duty guidelines.
- Flush plan to be confirmed by end user based on process conditions.
